

## Clicker Registration Information

---

### Clickers or Registration Codes

Depending on your professor's class policy, you may be able to select from one of two response device options:

1. Student ResponseCards: Students may purchase or use a TurningPoint ResonseCard to participate in class sessions. You may purchase these from the bookstore for \$40 (rental clickers are \$20). You may also use devices purchased or borrowed from friends or other outlets. The device pictured below is supported here at UH (NOTE: you can use either the LCD screen version shown below or the older version without the LCD screen).

2. ResponseWare: Students may also choose to participate using ResponseWare. ResponseWare can be accessed from mobile devices using the iOS (Apple), Android, Blackberry, or PalmOS platforms. **At this time, there is no app for Windows devices.** The app is free to download, but you will need to purchase a registration code based on the amount of time you will need the app. You can purchase these through the bookstore or directly through TurningPoint by going to <https://store.turningtechnologies.com/> and entering in the code **gG9N** when prompted for a school code. You can also use ResponseWare through any web browser by going to [www.rwpoll.com](http://www.rwpoll.com). **NOTE: It is your responsibility to download the ResponseWare app on your phone and to ensure the app is working properly.**

 **ResponseWare**

## Registering the Device

All devices will be registered through Blackboard Learn. Your professor will create a link on one of the content pages and you will need to login and enter your device ID. ReponseCard device IDs can be found on the back side of the clicker.

Responseware Device IDs are provided when you purchase a ResponseWare license.

The image is a screenshot of a web-based login interface. At the top, there are links for 'Your Account' and 'Logout'. Below that is a 'Welcome' message. The 'Device ID' is displayed as '10027440' and is circled in red. Below the device ID, there are input fields for 'First Name' (containing 'UH'), 'Last Name' (containing 'ADMIN'), and 'User Data'. A 'Continue' button is located below the input fields. At the bottom, there are links for 'Home', 'About ResponseWare', and 'Turning Technologies'.

**NOTE:** Whether you are using the ResponseCard or ResponseWare, all device IDs must be registered through the **ResponseCard** registration option. **Do not attempt to register the ResponseWare account through the ResponseWare registration area.** Once you click the ResponseCard image, the window will expand and provide a field where you can enter your Device ID.

The screenshot shows a user interface for registering devices. At the top, there are two options: **ResponseCard** (Handheld clicker device) and **ResponseWare** (Web enabled response system). A callout bubble points to the ResponseCard image with the text: "Click on the clicker image to register either a clicker or mobile device (see note above)". Another callout bubble points to the ResponseWare image with the text: "Do not use this option". Below these options is a table titled "My Registered Devices".

| Device ID |             | Device Type  |
|-----------|-------------|--------------|
| 100274    | Edit Delete | ResponseCard |
| 10027440  | Delete      | ResponseWare |

Below the table is a "Register a Device" section. A callout bubble points to the input field with the text: "If you are using a handheld clicker device, enter either a Clicker Device ID or a ResponseWare Device ID then click Register". The input field is labeled "Device ID (6 or 8 characters 0-9, A-F)". Below the input field is a "Register" button. To the right of the input field is an image of a ResponseCard device with an orange arrow pointing to the back of the device.

For more information, view the user guides at <http://www.turningtechnologies.com/user-guides>.
